8D

HIFU PRO

Work Theory

8D HIFU PRO is Non Surgical Face Lift Treatment- 8D HIFU PRO (High Intensity Focused Ultrasound) Technology, the aging effects will show on the skin like the wrinkles and the eye-bags. It is the signals to alert you your colla- gen and elastin are losing from your body. The collagen is the key structur- al component to support your skin.

8D HIFU PRO (High-Intensity Focused Ul- trasound) **which is the new technical for face lifting and tightening.**

8D HIFU Pro is delivered into the deep skin and cause thermal coagulation to SMAS (Superficial Muscular Aponeu- rotic System). It can provide the skin tightening and rejuvenation happens gradually with the time.

8D HIFU PRO technology device gives ef-fective, safe and painless skin tight-ening.

Effect

Strengthen and tighten relaxed skin with remarkable tightening effect

01

Only one treatment is needed to smooth wrinkles and improve them comprehensively.

02

Make skin texture more delicate and glossy

03

Filling in shrinkage and loss of collagen vacancies to enhance the relaxation profile

04

Remove the traces of age such as roughness, and Skin rejuvenation

05

Make skin tender, white and youthful

06

Q&A

Who is suitable for 8D HIFU PRO treatment？

It suit for 30 to 60 years old customer who want to reduce the pore size and looks younger.

when you will see the treatment result?

The immediate effect is 10%-30%, and the best effect is in 3-6 months

Q&A

why some clients have good effect of face lifting, but some clients have hollow cheek after treatment?

80% effect comes from the after treatment recovery, it's depend on patients skin property and recruitment of cell-repairing factor (such as DPHP)

(If patients age more than 30 years old, the collagen will loss more and more seriously, so before treatment, they need drink some Spe- cial repair of collagen ACMETEA so that can help regeneration of collagen fibers)

During these time, If Patients didn't support enough collagen timely,due to the deficiency of regeneration collagen will result in hollow cheek.

Q&A

▶

If a patient undergo 8D HIFU PRO treatment too fre- quently, what risk he will take ? what is the suitable interval time for 8D HIFU PRO treatment?

Usually the treatment results of 8D HIFU PRO treatment can last 2-3 years. 8D HIFU PRO treatment has a little damage on Subcutaneous, so we don't suggest a patient accept 8D HIFU PRO treatment too frequently, we suggest the interval time is above 2 years.

▶

How to do the postoperative care after 8D HIFU PRO treatment?

After the treatment, the patient can do the daily life. There is no spe-cial considerations. The treatment area maybe swelling, but don't worry, it will disappear after a few hours.
